Creating a Database in Cloudbant DB

The screenshot displays the IBM Cloudant dashboard interface. On the left, a dark sidebar contains navigation links: Monitoring, Databases, Replication, Active Tasks, Account, Support, and Documentation. The main content area shows the details for a database named 'noderedacup202...'. The 'All Documents' tab is selected, displaying a table view of documents. The table has two columns: 'key' and 'value'. Three documents are listed:

key	value
./design/library	{ "rev": "1-c93136490a097630889b3e8898772779" }
nodered/flow	{ "rev": "1-547734d298a28ba22e7d176688307eb" }
nodered/settings	{ "rev": "6-aded8cf5030a9f2df19e0fe336285a" }

At the bottom of the dashboard, there is a status bar showing the temperature (29°C), weather (Mostly cloudy), and system information (Log Out, IP: 166.46.7009.1RD, 11:39 AM, 11/9/2022).
